

MOONS'

moving in better ways

Low Voltage Servo Brushless General Catalog

**Low Voltage Servo Drive & Motor
DC Brushless Drive & Motor**

Dawn of MOONS' 3A Era

1st A Motion Products & Motion Control Products for Manufacturing Automation

MOONS' is a leading manufacturer of the key parts, components and system level products used in manufacturing automation including: Stepper Motor and Drive, Brushless Motor and Drive, AC Servo Motor and Drive, Integrated solutions. We continue to play a major role in the manufacturing automation field with us moving forward to being a system level provider of total motion control solutions.

2nd A Intelligent LED Driver & Control Technologies for LED Lighting Management Automation

3rd A Online Asset Monitoring, Fault Detection and Diagnosis Solutions for EAM Automation

MOONS' Business Philosophies

• Customer satisfaction

MOONS' aims to enhance customer satisfaction through the provision development of innovative solutions, manufacture of high quality products, and ontime delivery and outstanding customer support.

• Employee satisfaction

MOONS' values and respects our employees input and encourages them to grow together with the company. We have been working to develop tools and trainings to build a thriving culture of excellence internally to support the future growth of our employees and the company.

• Partnership

MOONS' strongly believes in a true integrated partnership between all partners in business including customers, distributors and all these in supply chain. As a result of our this philosophy, we endeavor to provide the best value contribution to all partners, which can help our partners improve their competitiveness to achieve the win-win situation.

To demonstrate our commitment to our community and our customers, **MOONS'** has adopted as our official slogan: "Moving in Better Ways". These words have following meanings to **MOONS'**:

- **MOONS'** is an excellent global manufacturer of control motor & control motor drive system
- **MOONS'** is a leading global supplier of intelligent LED lighting control system and drive solutions
- **MOONS'** is a well-recognized reliable provider of system solutions for the intelligent system management in large asset-intensive industrial enterprises

We provide superior motion control systems to our global customers through optimizing of product design, engineering, and manufacturing. This is done by strengthening process and quality control and constantly creating solutions using motion control products that are more energy efficient and environmental friendly.

We provide leading-edge LED lighting drivers, controls and management solutions. Our leading lighting control technology makes the drive professional, convenient to use, and more energy efficient in reducing costs and enhancing profits for global customers.

We provide management system solutions for large asset-intensive industries including power generation, petrochemical, metallurgy, coal and large scale agriculture.

- **We are an ambitious and enterprising company**

MOONS' never stops the on-going accelerated pace to improve processes and increase efficiency. Through scientific management methodologies and tools and incorporating advanced technology with senior management experience, we constantly optimize management processes that enable **MOONS'** to maintain on-going growth in competitive markets.

- **We are a cooperative and thriving group**

All members of our team are able to incorporate the concept of moving in better ways during work, they continually upgrade our collective values, and strive for excellence in the process of doing business to improve expertise and gain better opportunities.

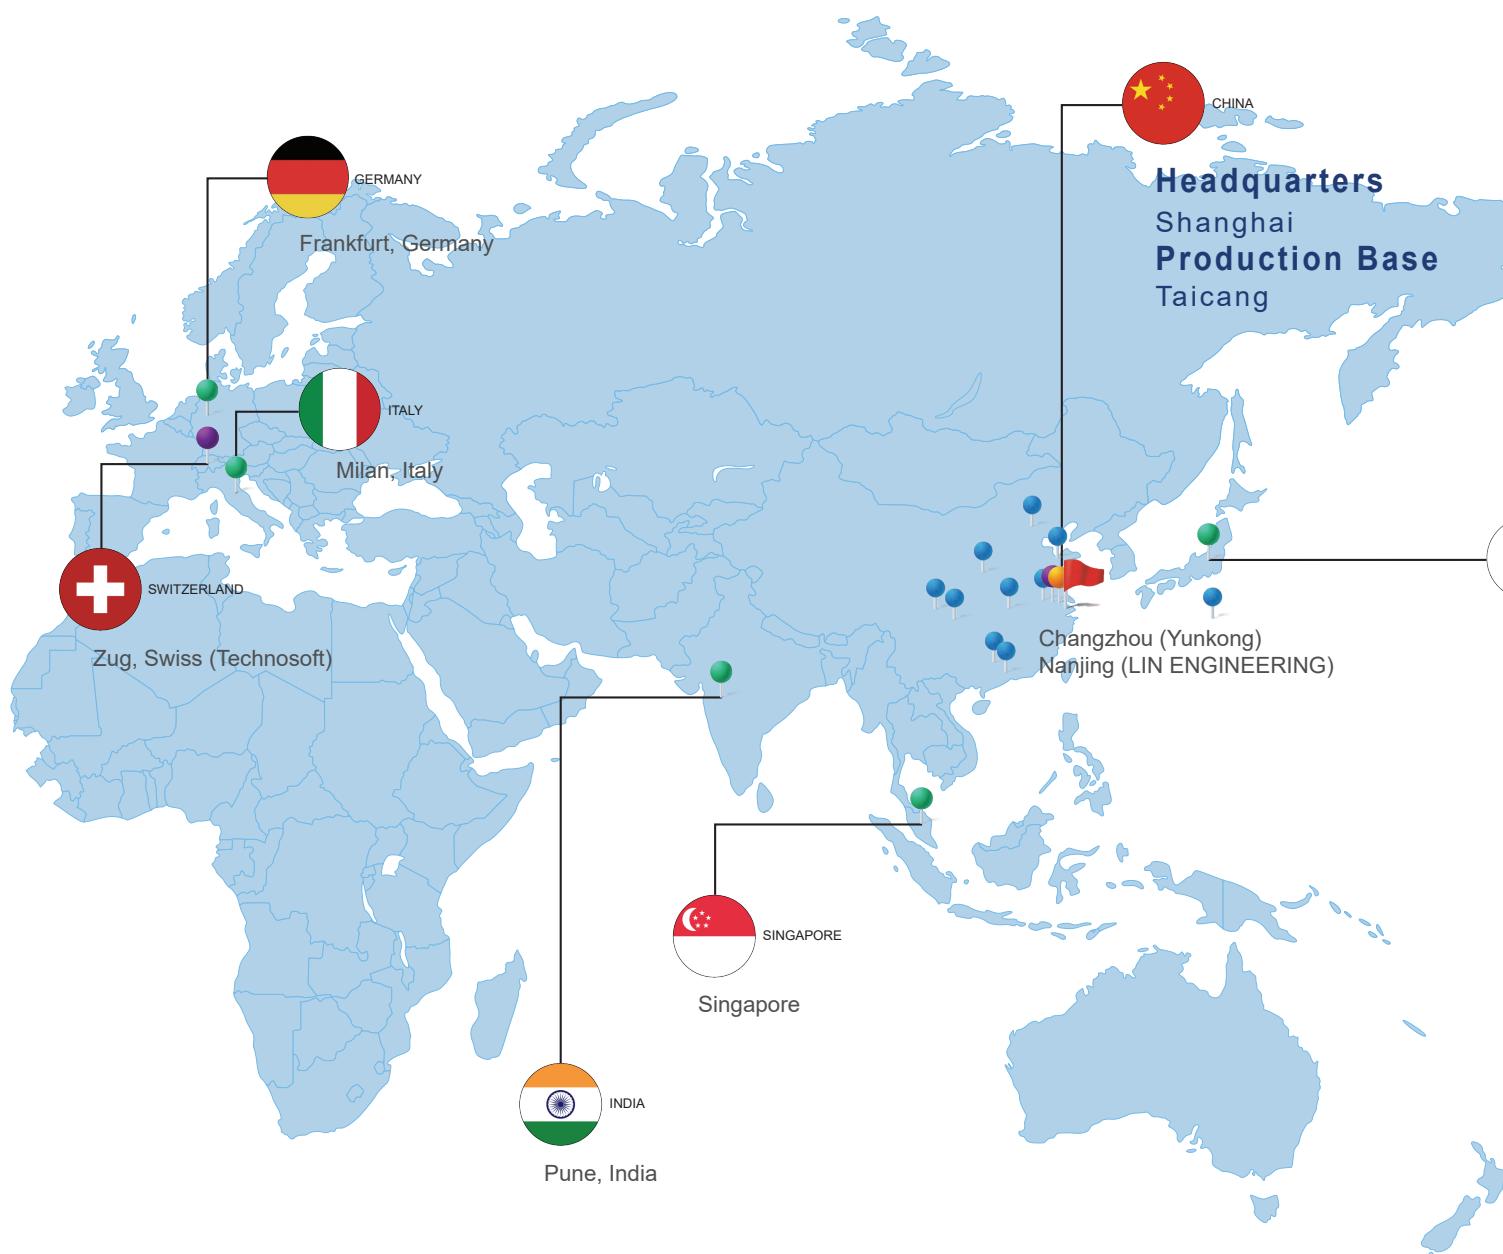

Motion Control Products and Solutions

MOONS' provides a wide range of motion control products and solutions serving the fields of printing, intelligent stage lighting, textile machinery, consumer appliance, banking equipment, factory automation, electronics, semiconductor equipment, packaging machinery, medical equipment and measuring equipment, to name a few.

Entering into the hybrid stepper motor business in 1997, **MOONS'** has grown to where it is now one of the top 5 global manufacturers of stepper motors, and an integrated provider of related motion control products and solutions.

MOONS' has been and is concentrating on technological advancement, product design innovation and improvement for standard and customized motion control products and solutions. Cutting edge technologies, product improvement and scientifically proven management systems permit **MOONS'** to exceed customers' requirements around the world. **MOONS'** supports our growing customer base by providing exceptional quality, application engineering, rapid prototyping, regional warehousing and competitive pricing.

MOONS' has set up twelve offices in China, as well as subsidiaries in other countries including the United States, Italy, Singapore, Japan and Germany. Our business covers major countries and regions in North America, Europe, Asia and Southeast Asia ensure MOONS' close to where you are.

■ Products Overview

◇ MBDV Series Servo System

MBDV Series-DC Input Servo Product

CE RoHS Compliant

Input Voltage: 24-60VDC

Motor Frame Size: 40mm, 60mm, 80mm

Motor Power(W): 100, 200, 400, 750

Encoder: 16-bit, 2500 Lines, 1024 Lines incremental encoder

Features:

- Compact size, single and dual-axis design options
- Tuning-less servo and auto-tuning function
- Synchronous shutdown when fault occurs
- Field bus communication watch dog and emergency stop
- Toggle switch for node ID, baud rate and terminating resistor settings
- Wireless Debugging
- STO function safety

Position Control

Velocity Control

Torque Control

Control Modes:

- Field Bus Control, Integrated Daisy chain Interface
- Q Program

Inputs and Outputs:

- 4 Digital Inputs, 2 Digital Outputs, 1 Dedicated motor brake control output
- Encoder Feedback Output, Supporting pulse division function

Communications:

CANopen Modbus

◇ M2 Series Servo System

M2DC Series-DC Input Servo Product

CE RoHS Compliant

Input Voltage: 24-60VDC

Motor Frame Size: 40mm, 60mm, 80mm

Motor Power(W): 60, 100, 200, 300, 400, 550, 750

Encoder: 2500 Lines incremental encoder

Features:

- Easy to Use On-line Auto Tuning
- Internal Regeneration Resistors
- Built-In Soft PLC - Q Programmer
- Easy Tuning Software
- Multistage Speed Control
- Position Tables

Position Control

Velocity Control

Torque Control

Control Modes:

- Pulse Control
- Field Bus Control, Integrated Daisy chain Interface
- Analog Control
- Q Program

Inputs and Outputs:

- 12 Digital Inputs, 6 Digital Outputs
- 2 Analog Inputs
- 2 Line receiver inputs
- Encoder Feedback Outup

Communications:

SCL → eSCL → EtherNet/IP Modbus

◇ BL Series Brushless Product

BLD Series- Brushless DC Motor & Drives

CE RoHS Compliant

Input Voltage: 24-48VDC

Motor Frame Size: 42mm, 57mm

Motor Power(W): 30, 60, 90, 120, 180

Features:

- Wide Speed Control Range
- Excellent Speed Stability
- Compact and High Efficiency
- Low Power Consumption, Low Noise, Low Vibration
- Long Life and Low Maintenance Requirements
- Low Torque Ripple

Velocity Control

Control Mode:

- Velocity Control

Inputs and Outputs:

- 8 Digital Inputs, 2 Digital Outputs
- 1 Analog Input

Communication:

SCL → Modbus

MBDV Series Servo Products

MBDV series drive is a new generation of high performance and DC powered servo products. It adopts advanced fully digital motor control algorithm that enables high precise position, speed and torque control with low-voltage servo motors. The servo system also adopts a new enhanced high resolution magnetic encoder and a new winding design low-voltage servo motor. The motor frame sizes supported are 40/60/80mm and the rated power range is from 100W to 750W.

MBDV series products have excellent feedback response and short settling time. It supports tuning-less function, fine-tuning and vibration suppression functions. MBVD servo drives support Modbus/RTU and CANopen field bus options.

Luna is the software for MBDV drive. It is a windows-based platform for all your configuraiton, tuning and testing requirements. High-speed USB connection as well as wireless connection are also enabled with the MBDV and Luna combination.

Features

- Compact size, single and dual-axis design options
- Wide range of power input, main power voltage 24~60VDC
- Optional AUX power voltage 24VDC $\pm 10\%$
- Up to rated output current 20Arms, peak current 60Arms for each axis
- Compatible with 100W~750W servo motors
- Featuring both with CANopen & RS485 communication capabilities
- High speed USB communication
- Wireless debugging interface up to 20m transmission distance
- Compatible with full signals & SPI communication type encoder
- Toggle switch for node ID, baud rate and terminating resistor settings
- LED digital display information
- Drive over current, over voltage and over temperature

Highlights

- Built-in soft PLC—Q proframmer
- STO compliant with SIL2 level
- Tuning-less and auto-tuning function
- Synchronous shutdown when fault occurs
- Field bus communication watch dog and emergency stop
- Control algorithm to achieve motor collision protection

Features

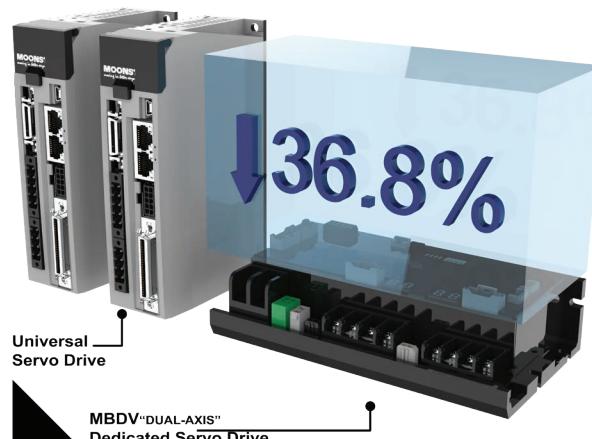

■ High-precision Encoder

Enhanced 16-bit high resolution encoder enables smooth speed control and high precise position control of the servo system. Serial communication encoder is used for high EMI immunity and wiring simplicity.

- ◆ High resolution, up to 65,536 counts per revolution
- ◆ Robust design for harsh environment applications
- ◆ Stronger anti vibration ability
- ◆ Dust, oil and condensation resistance

■ Compact Design

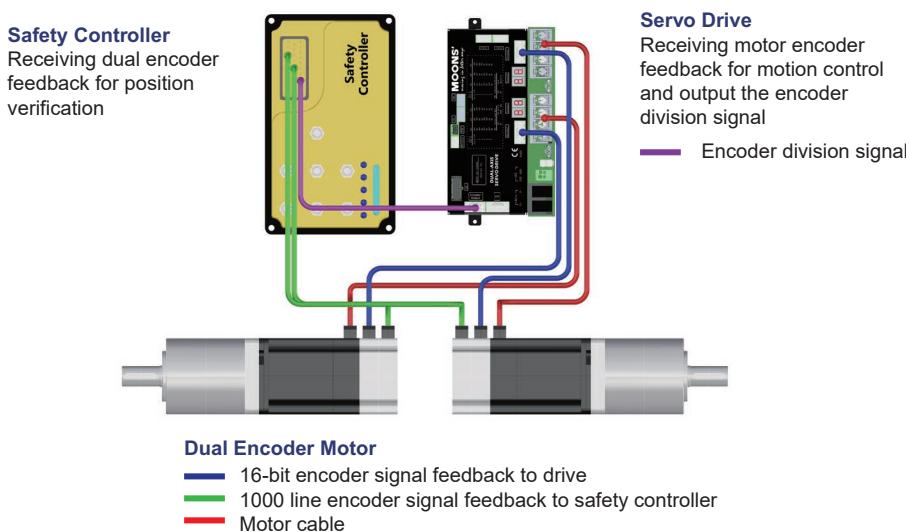

MBDV dual axis design significantly reduces the size of the drive, it is a 36.8% drive size reduction compare to conventional servo drives.

■ Safe

● Dual Encoder Safety System

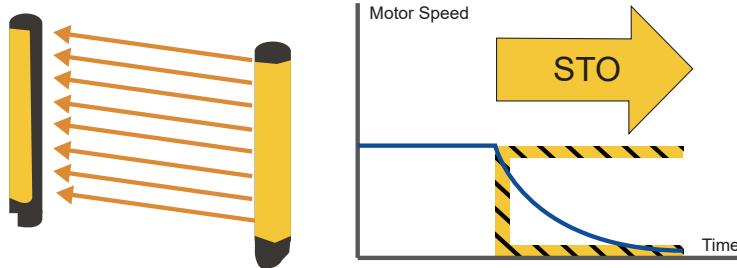

Dual encoders can provide reliable position and speed feedback for the safe operation of the device, together with the safety controller to achieve the required safety functions of the system.

● STO

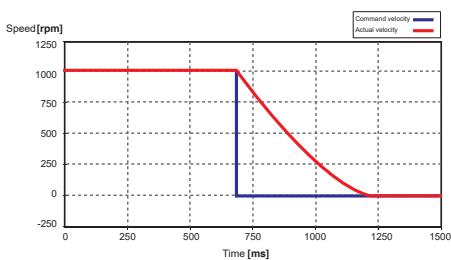

Safe Torque Off (STO) is a hardware level safety protection function. When the STO function is activated, the ability to drive motor current is cut-off. In case of an emergency, this function can ensure personnel and equipment safety while the drive is continuously powered.

MBDV series drive meets UL61800-5-2(SIL2), IEC61508, ISO138491(PL d).

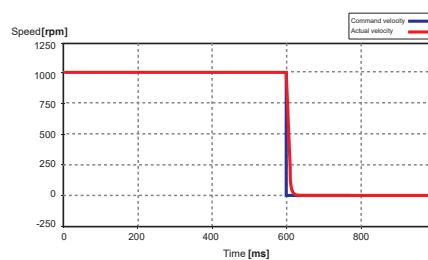

● Dynamic Brake

Dynamic braking is a mechanism that stops the motor with the high deceleration rate by shorting the motor's three phases in case of an emergency. The intention is to ensure personnel and equipment safety. Dynamic braking is driven by the motor's back EMF current. No external power source is needed to engage or disengage the brake function.

Without Dynamic brake

The drive will switch to disabled after the fault alarm activates. The motor will stay in an uncontrolled deceleration until it stops. The deceleration time depends on factors like speed, inertia, friction etc.

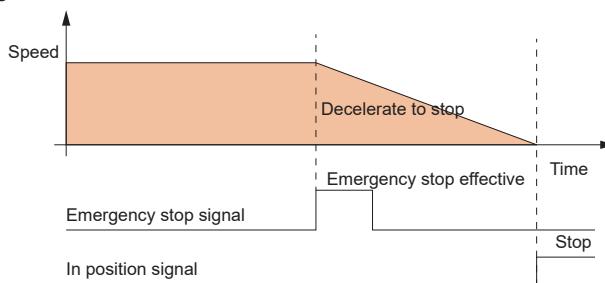

Dynamic brake is in effect

The command velocity is set to 0 as soon as the drive is disabled. The actual velocity ramps down immediately as the brake is applied.

● Emergency Stop

- ◆ When the communication between the controller and drive fails during the motor movement, the drive will trigger the watch dog, the motor decelerates according to the set mode.
- ◆ When the motor needs to be decelerated and stopped immediately in an emergency situation during movement, it can be triggered by the I/O or field bus control commands, the motor decelerates according to the set mode.

● Protection

Over voltage protection

Over current protection

Over temperature protection

■ Easy Tuning

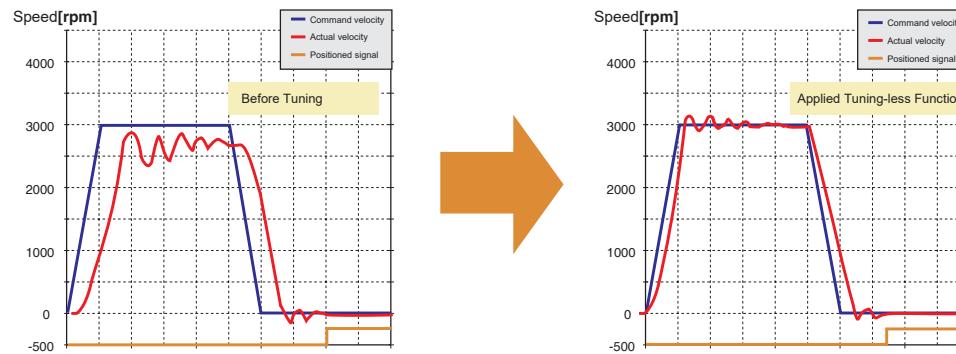

● Wireless Debugging

MBDV series servo drive is equipped with high-speed USB debugging interface, AGV dedicated drive has a wireless debugging interface with a transmission range of up to 20m, making field debugging more convenient.

● Tuning-less Function

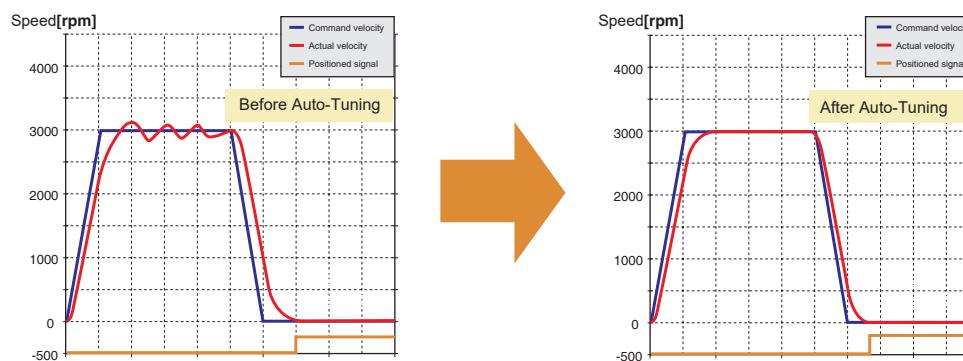

- ◆ No tuning required for loads with up to 30 times the rotor inertia.
- ◆ No limitation towards any load type and drive control mode.
- ◆ High robustness for maximum control of servo system stability.

● Auto-tuning

The auto-tuning algorithm can automatically identify the load inertia (ratio), gain and vibration suppression parameters in real time.

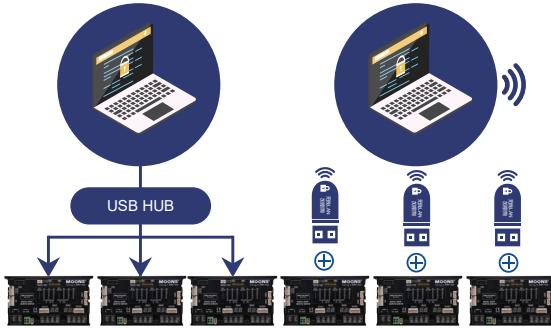

The auto-tuning function can greatly shorten your system tuning time, improve system responsiveness and equipment production efficiency.

Friendly Software

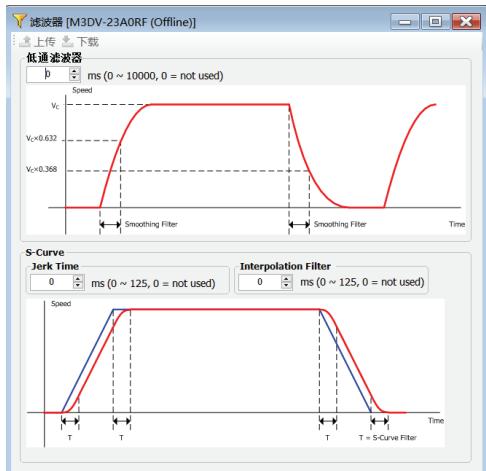

■ Multi-axis Tuning

Based on USB or Wireless communication, it can realize multi-axis tuning, simple and convenient.

■ Graphical Setting Interface

The setting interface adopts a simple and clear graphical interface, which can intuitively set the required functions.

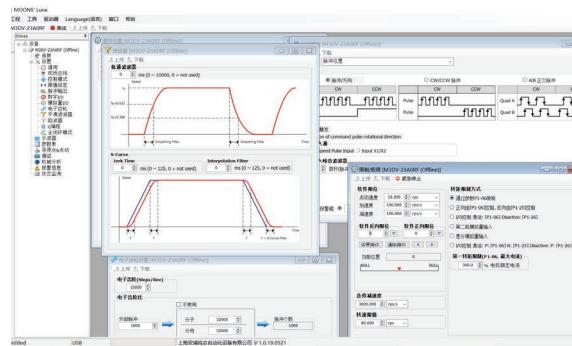

■ Powerful Oscilloscope Function

- Real-time data curve display
- Up to 4 channels with 16bit data per channel and 8kHz sampling rate
- Up to 2 channels with 32bit data per channel and 8kHz sampling rate
- In the selected cursor area, the software can display the maximum value, minimum value, root mean square, etc.
- Customizing trigger conditions
- Monitoring the operation status of the drive and the digital inputs and outputs

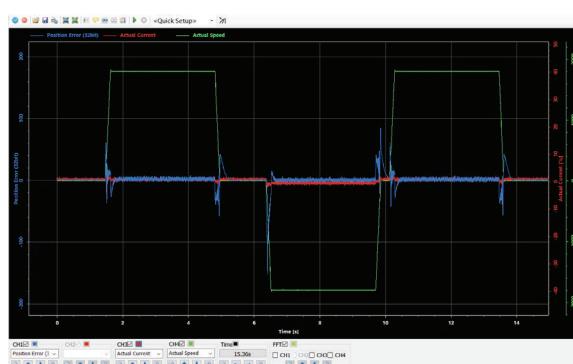

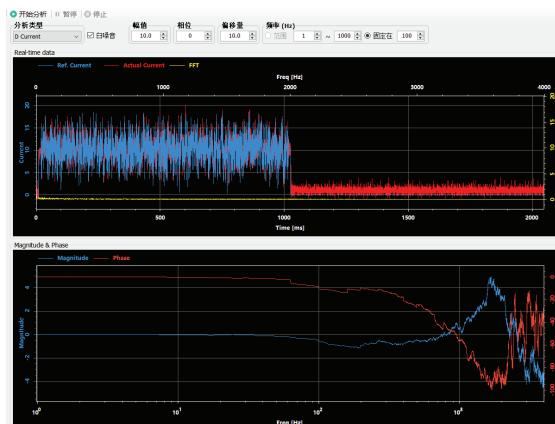

■ Tree Structure

Newly-designed tree-structure software, multi-window display as well as clear function classification.

■ Mechanical Analysis

Quickly diagnose the frequency characteristics of mechanical equipment and draw a Bode diagram. It can be used to detect the resonance point and frequency response characteristics of the machine, and quickly set the notch filter.

Field Bus Control

MBDV servo drive supports Modbus/RTU and CANopen protocol based on CANbus.

■ CANopen

Standard CAN bus interface is available in MBDV series servo drives, which makes it easy to get integrated to an industrial field bus.

Items	Specification
Physical Layer Standard	CiA 303-1 Cabling and connector pin assignment
Communication Protocol	CiA 301 Application Layer and Communication Profile CiA 402 Device Profile Drives and Motion Control
Bus Connector	Molex
Baud Rate	12.5Kbps, 20Kbps, 50Kbps, 125Kbps, 250Kbps, 500Kbps, 800Kbps, 1Mbps
Communication Objects	SDO, PDO, SYNC, EMCY, NMT, Heartbeat
Control Mode	Interpolated Position, Profile Position, Profile Velocity, Profile Torque, Homing Mode
PDO Data	4 RxPDOs, 4 TxPDOs
Support Axis	Up to 112 axes

■ Modbus

MBDV series servo drives provide the Modbus/RTU communication function with RS-485 interface, which can be used to easily control the motor, set parameters or monitor the status of the drive.

Items	Specifications
Physical Layer Standard	RS-485
Communication Protocol	Modbus/RTU
Bus Connector	Molex
Baud Rate	9600bps, 19200bps, 38400bps, 57600bps, 115200bps
Control Mode	Position Mode, Velocity Mode, Torque Mode, Homing Mode, Q Program
Support Axis	Up to 32 axes

General Specifications

Certification Specification

MBDV series products are designed to meet the following standards.

		Drive	Motor
Europe	EMC Command	EN 61800-3	EN 55011
			EN 55014-1
			EN 55014-2
			EN 6100-3-2
			EN 6100-3-3
	LVD	EN 61800-5-1	EN 60034-1
	EN 60034-5		
STO		UL61800-5-2(SIL2)	
		IEC61508	
		ISO13849-1(PL d)	
UL Standard		UL 61800-5-1	UL 1004-1
			UL 1004-6
CSA Standard		C22.2 No.274-13	CSA C22.2 No.100

Motor Specification

Insulation Class	Class B (130°C)	Ambient Temperature	Operating 0 to 40°C, Storage -20 to 60°C
IP65 Rating	IP65 (Except transfixion part of shaft)	Ambient Humidity	Operate where the relative humidity range is 20% to 85% and non-condensing
Installation location	Indoor installation, avoiding direct sunlight, corrosive and flammable gas	Altitude	Operating 1,000m
Vibration	Under 49m/s ² , 10 ~ 60Hz(Do not use continuously at resonance frequency)		

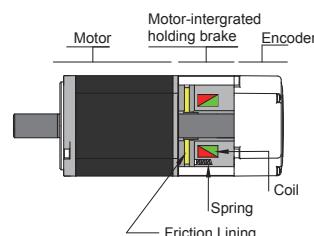

Brake Specification

Motor brake is used to prevent motor shaft rotation when the servo system is powered off. The most common application is in vertical applications, in which the brake is used to prevent displacement of the load under the influence of gravity when the servo system is powered off.

When the brake is powered on, the armature is adsorbed, the brake pad is released, and the motor can operate normally.

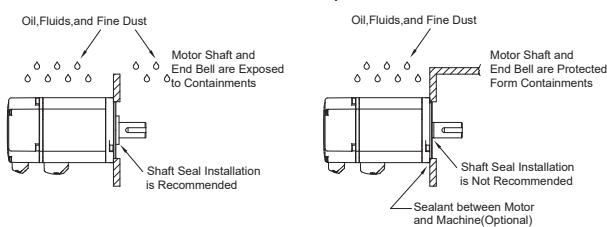

When the brake is powered off, the armature is released, the brake pad is locked, and the motor can't rotate normally.

Frame Size	40mm	60mm	80mm
Static friction torque (Nm)	0.32	1.5	3.2
Rated Voltage (VDC)		24	
Power (W)(20°C)	6.9	7.2	10
Rated Current (A)	0.26	0.3	0.42
Brake Time	< 70ms (Standard air gap, at 20°C)		
Release Time	<25ms		
Release Voltage	18.5VDC max.(at 20°C)		

Shaft Seal

Industrial oil seals can block contaminants (oils, impurities) to extend the life of the motor. The oil seal will produce a certain resistance to the motor shaft, about 10% torque will be lost.

M2DC Series—DC Servo System

The M2DC Series Servo System from MOONS' features drives that are high on functionality with a range of control options, programmable notch filters, an anti-vibration algorithm and auto-tuning. The drives are designed to be used with MOONS' servo motors in the 60/100/200/300/400/550W/750W power range. The M2DC drives can communicate over Modbus/RTU, Ethernet/IP and Ethernet(eSCL). Using MOONS' Q Programmer software they can create complex motion programs that can be stored in the drive and then run in a stand-alone mode.

Features:

- 24-60V DC Input
- Easy to Use On-line Auto Tuning
- Internal Regeneration Resistors
- Built-In Soft PLC - Q Programmer
- Pulse Position Control Modes
- Analog Position, Speed, Torque Modes
- SCL/eSCL Language Communication
- Support Modbus, EtherNet/IP, Ethernet(eSCL) Communication Protocols
- Friendly Tuning Software

■ M2DC Servo Drive Numbering Information

M2DC - 10D 5 R - H ***

Note: The drive only applies to battery power supply if the power type is -H.

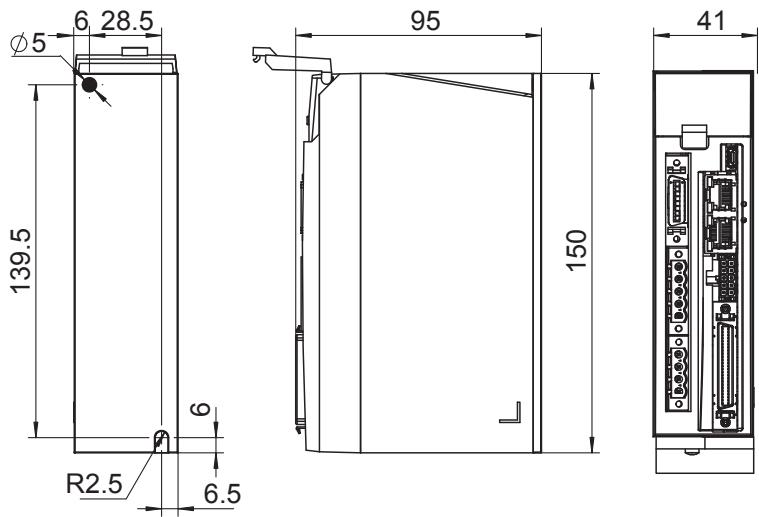

M2DC-20D5□-H support SPS and battery power supply.

■ Drive Specifications

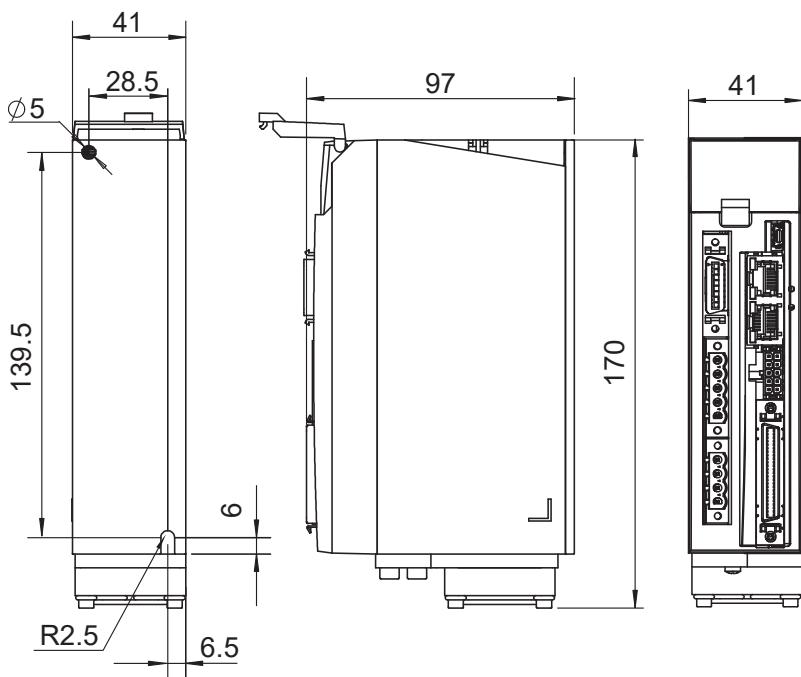

Input Power	M2DC-6D0	Main Circuit	24~60VDC
	M2DC-10D	Auxiliary power supply	10~60VDC
Withstand Voltage		Primary to earth: withstand 500 VAC, 1 min	
Environment	Temperature		◆ Ambient temperature: 0°C to 50°C (If the ambient temperature of servo drive is higher than 40°C, please install the drive in a well-ventilated location) ◆ Storage temperature: -20°C to 65°C
	Humidity		Both operating and storage: 10 to 85%RH or less
	Altitude		1000m and below
	Vibration		9.8m/s ² or less, 10 to 60Hz (No continuous use at resonance frequency)
Control method		PWM Sinusoidal wave drive	
Encoder feedback		2500line incremental optical encoder	
I/O	Digital Signals	Input	◆ 8 optical isolated multi function inputs, 5~24VDC, 20mA ◆ 2 optical isolated multi function inputs, 5~24VDC, 20mA
		Output	6 optical isolated multi function outputs, 30VDC max, 20mA
	Analog Signals	Input	2 inputs (12Bit A/D: 2 input)
	Pulse Signals	Input	◆ 2 Photo-coupler inputs: 5 ~ 24V, minimum pulse width 1μs, max. pulse frequency 500KHz ◆ 2 Line receiver inputs: 5V differential signal, minimum pulse width 0.25μs, max. pulse frequency 2MHz
		Output	4 outputs (Line driver: 3 outputs, open collector: 1 outputs)
	USB Mini-B		Connection with PC or 1 : 1 communication to a host.
Communication	RS232		RS-232 Communication
	RS485		RS-485 Communication & Modbus/RTU
	Ethernet		EtherNet/IP, Modbus/TCP, eSCL
	Front panel		4 keys (MODE, UP, DOWN, SET), 5-digit LED display
Regeneration Resistor		Built-in regenerative resistor 20W	
Control mode		1. Position mode 2. Analog Velocity mode 3. Analog Position mode 4. Analog Position mode 5. Velocity Change mode 6. Command Torque mode 7. Command Velocity mode 8. Position Tables	
Control Input Signal		1. Servo-ON input 2. Alarm clear input 3.CW/CCW Limit 4. Pulse& Direction or CW/CCW input 5. Gain Switch 6. Control mode Switch 7. Pulse Inhibition 8. Gear switch 9. Velocity Change mode 10. Analog input 11. General input	
Control Output Signal		1. Alarm output 2. Servo-Ready output 3. External brake release 4. Speed reached output 5. Torque reached output 6. Position reached output 7. TachOut 8. Servo-On status output 9. General output	
Certification		RoHS, EN 61800-3, EN 61800-5-1	
Drive Weight	M2DC-6D0	0.59Kg	
	M2DC-10D	0.59Kg	
	M2DC-20D	0.61Kg

■ USB mini-B Configuration Cable

Description	P/N	Num.	Manufacturer	Details
USB mini-B Configuration Cable	2620-150	1	MOONS'	For connector CN1

■ CN6\CN7 RS-485 Daisy Chain Cable

P/N	Description
2012-030	Common type, Twisted-pair, 0.3m
2012-300	Common type, Twisted-pair, 3m
2013-030	Shielded type, Twisted-pair, 0.3m
2013-300	Shielded type, Twisted-pair, 3m

■ Connector Accessories

◆ I/O Connector-CN2

P/N	M2-50P
-----	--------

◇ Includes

Item	P/N	Num.	Manufacturer	Details
Connector (drive side)	5-2232346-1	1	TYCO	For I/O connector CN2

◆ Power Connector Kit(Below 6A)

P/N	M2 Motor Connector Kit
-----	------------------------

◇ Includes

Item	P/N	Num.	Manufacturer	Details
Connector (drive side)	3-2232346-1	1	TYCO	For encoder connector CN3
Connector	172159-1	1		For motor power connector
Connector	172233-1	1		For motor brake connector
Connector PIN	170362-1	6		For motor power connector
Connector	172161-1	1		For motor encoder connector
Connector PIN	770834-1	9		

◆ Motor Connector Kit(Above 10A)

P/N	M2 Motor Connector Kit2
-----	-------------------------

◇ Includes

Item	P/N	Num.	Manufacturer	Details
Connector	350780-1	1	TYCO	For motor power connector
Connector PIN	350536-1	4		For motor power connector
Connector	172233-1	1		For motor brake connector
Connector PIN	170362-1	2		For motor brake connector
Connector	172161-1	1		For motor encoder connector
Connector PIN	770834-1	9		For motor encoder connector
Connector (drive side)	3-2232346-1	1		For encoder connector CN3

◆ Encoder Connector-CN3

P/N	M2-26P
-----	--------

◇ Includes

Item	P/N	Num.	Manufacturer	Details
Connector (drive side)	3-2232346-1	1	TYCO	For encoder connector CN3

◆ STO Connector Kit

P/N	STO Connector Kit
-----	-------------------

◇ Includes

Item	P/N	Num.	Manufacturer	Details
Connector	43025-1000	1	Molex	For STO connector CN5
Connector PIN	43030-0005	10		

◆ P1 Power Connector

P/N	5452570
-----	---------

◆ P2 Motor Power Connector

P/N	5452571
-----	---------

■ Certification specification

M2DC series products are designed to meet the following standards.

		Drive	Motor	
Europe	EMC Command	EN 61800-3	EN 55011	
			EN 55014-1	
			EN 55014-2	
	LVD	EN 61800-5-1	EN 6100-3-2	
			EN 6100-3-3	
			EN 60034-1	
STO	UL61800-5-2(SIL2)			
	IEC61508			
	ISO13849-1(PL d)			
UL Standard		UL 61800-5-1	UL 1004-1 UL 1004-6	
CSA Standard		C22.2 No.274-13	CSA C22.2 No.100	

■ Motor Specification

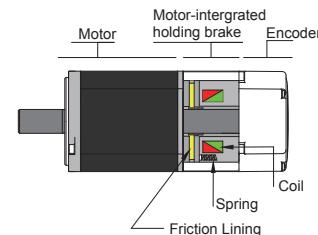

Encoder Type	2500ppr Incremental encoder	Ambient Temperature	Operating 0 to 40°C, Storage -20 to 80°C
Insulation Class	Class B (130°C)	Ambient Humidity	Operate where the relative humidity range is 20% to 85% and non-condensing
IP65 Rating	IP65 (Incremental encoder)	Altitude	1000m and below
Installation location	Indoor installation, avoiding direct sunlight, corrosive and flammable gas	Vibration	49m/s ² , 10Hz-60Hz (DO NOT use the drive for extended periods of time at the resonance point.)

■ Brake Specification

A holding brake is used to stop the load from moving when power is lost. Typical applications include vertical axis that would drop if power is lost. Holding brakes are not intended to slow a motor that is spinning. The motor should be stopped and then the brake applied.

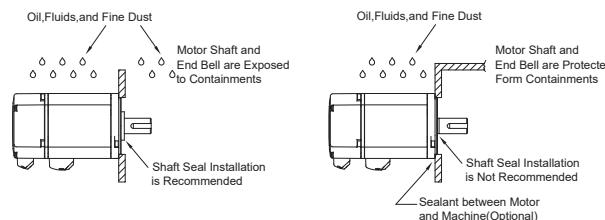

With no power, a spring presses a friction plate into a stationary plate, which produces holding torque. When power is applied to the brake coil, the brake solenoid pulls the friction plate away from the stationary plate, which allows the motor to turn.

Frame Size	40mm	60mm	80mm
Static friction torque (Nm)	0.32	1.5	3.2
Rated Voltage (VDC)		24VDC	
Power W (20°C)	6.9	7.2	10
Rated Current (A)	0.26	0.3	0.42
Brake Time	Standard air gap, below <25ms		
Release Time	<25ms		
Release Voltage	18.5VDC max.(at 20°C)		

■ Shaft Seal

Industrial oil seals can block contaminants (oils, impurities) to extend the life of the motor. The oil seal will produce a certain resistance to the motor shaft, about 10% torque will be lost.

BLD Series—Brushless DC Motor Drive System

Features

- Wide speed control range
- Excellent speed stability
- Compact and High efficiency
- Low power consumption, Low noise, Low vibration
- Long life and Low maintenance requirement
- Low cogging torque, Low torque ripple

Introduction

MBDV Low Voltage Servo Motor & Drives

M2DC Low Voltage Servo Motor & Drives

BLD Brushless DC Motor & Drives

■ Features

◇ DC Input

Input Voltage: 24-48VDC

◇ Various Velocity Commands

- Internal Analog velocity control
- External Analog velocity control
- Multi-velocity control by digital input
- SCL commanded velocity control

◇ Sine-waveform Current Control

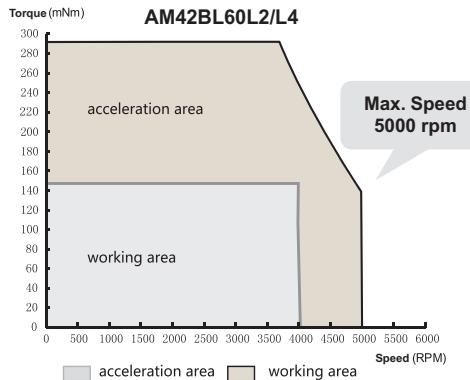

◇ 200% Overload Torque Output

◇ Velocity Control Range 150-4500rpm

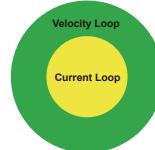

- Velocity control range of 150-4500r/min, Velocity ratio 1:30

◇ Excellent Velocity Stability

- Velocity Regulation (under load) is $\pm 0.5\%$

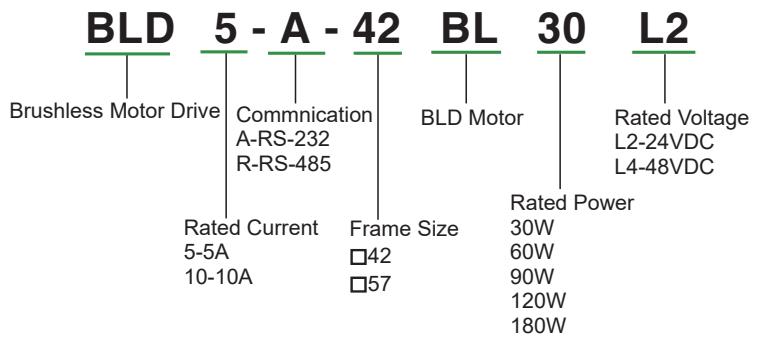

◇ Dual Closed-loop Control

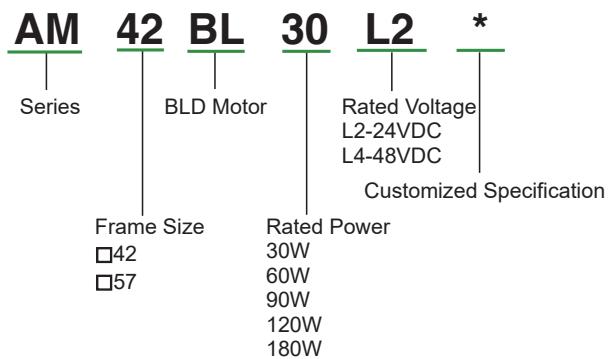

◇ Ultimate Performance

- Low heat
- Low noise
- Low vibration
- Low cogging torque
- Support RS-232&RS-485 Communication Control

10		Speed Out-	Y2-	
-		MOVE	-	This signal will output when the motor is rotating.
-		VA	-	This signal will output when the motor speed reaches the setting speed.
-		Fault2	-	This signal will output when the drive overload.
-		Warning	-	This signal will output when the drive has an alarm.
-		TLC	-	This signal will output when the output torque reaches the limited value.
-		IDLE	-	General output

■ Potentiometer&LED

Speed Setting

This potentiometer can be used for adjusting speed. The velocity range can be set in BLD Configurator software. The default range is 150 to 4500rpm.

Acceleration Setting

This potentiometer can be used for adjusting acceleration and deceleration. The acceleration and deceleration range are same and can be configured in BLD Configurator software. The default range is 0 to 3000rps²
